Comments: This is a fully formed, unbroken, ^{and} ~~tot~~ semi-lens. The two flat blade surfaces are smoothed to shiny. The rest of the surface is lightly polished. The butt end is lightly polished. The butt end is convex, w/ some light peck marks. While the blade end is nicely made, the remainder is slightly crude & unfinished. The blade is very smooth – like it was formed & then used a bit. The color is a blue/green w/ brown/tan flecks. This is a larger, skinnier version of most hachas.
